## Choosing the Right Equipment Worksheet

Directions: The tools we use in science are very important. They don't have to be complicated machines or lab equipment. Consider each hypothesis below and write the tool or tools you could use to prove each hypothesis?

1. It's warmer on the west side of my house than on the east side.
2. Plants in the sun grow faster than plants in the shade.
3. Taking a shower is quicker than taking a bath.
4. My bedroom is longer than it is wide.
5. I weigh more in the morning than I do at night.
6. I use more milk on my cereal than my brother does.
